Doom meets pubG, Pretty epic stuff.. shows potential as a classic overhead arcade shooter but right now it crashes randomly, its literally a Flash game on Steam, the inventory system makes no sense, the enemies are too tough, and the developers just took pictures of themselves and made those cutscenes. This game is an awesome game it feels like Mario cart, The graphics are just beautiful and just the diversity in cars and characters is awesome. Love the trainer!!!! The graphics and simplicity are amazing. The only I can think of right now is in Endless Mode(my favorite), if you can please have a custom option for any gun to be used, unlimited or no reload of ammo on/off, and timer on/off.....I feel if you focus on customization for endless mode, it will for sure bring this trainer to the top. KEEP UP THE GREAT WORK!!!!. very dull im sorry it does not hold up. Great fun when playing multiplayer mode, proving a little tricky on your own. Smooth gameplay and good sense of trekking round a jungle..

Work great!

I recommend!

---

A fun hero defense game that can be played both alone or with up to other 4 players, with a diverse item system and several maps with several different difficulty levels. I highly recommend to anyone who likes Co-op games and/or Warcraft 3 & its multiple custom game modes (like me).

(This Not a MOBA, its' purely PvE, it only plays in a slightly similar way due to the controls, but this is just because, like MOBAs, this game is inspired by a Warcraft 3 type of map, Hero defense. MOBAs came from the AoS map type.). This game is my favorite game of all time ive been playing since the first one came out on browser and im glad to see how it has grown and added so much new stuff if you can you must buy this game its so fun!. its at best only half as good as the Heracles series. i fairly don't understand the whole endeavour, the story doesn't draw me in at all. the mechanics at first seem similar but somehow it's just a hassle, not engaging. & as the other reviewer wrote, it has only one difficulty level & a very narrow error margin, so it's rather just a puzzle game to get the things build & done as quickly as possible in the "right" order, which i find completely boring in a game. i will refund, even if it's just few bucks, but i know i won't be playing it.. I played it a bit when I was bored, and I have to say it makes a very good time killer. Sell a CS:GO skin or something and get it if you're into retro graphics and high scores.. Great if you love bottom-of-the-barrel Russian games, it's pretty hilarious.

<https://www.youtube.com/watch?v=LKNvGuAnGHc>

Watch out though: the AI has perfect aim and will shoot the moment they see you. The puzzles/levels can be obtuse and not well explained as well.. First 18+ game on Steam I purchased, and it's [REDACTED]
